*Everyone talks about environmental protection -
we practice it and reduce the CO₂ emissions!*

What's Relumat2000?

- environmentally friendly
- extreme durability
- impermeable to water
- resistant to oils, alkalis, acids and seawater
- weather resistant and not rotting
- dimensionally stable
- moisture repellent
- maintenance-free
- no impregnation necessary
- splinterproof, non-slip, no risk of injury
- easy removal of scratches and graffiti
- heat and frost resistant
- high heat and electricity insulation
- winterproof

Areas of Relumat2000:

- public institutions
- green areas
- visual and noise protection
- gardening and landscaping
- hydraulic and civil engineering
- animal farming, forestry and agriculture
- industry
- crafts
- private Customers
- garden centers
- dealers
- construction of sports fields
- playgrounds

Components of Relumat2000:

Relumat2000 is a synthetic material with the following components: PE (polyethylene), PP (polypropylene), other plastics (without PVC and PET) and other ingredients (glass, sand, aluminum, etc.) *

* Only certain products contain additional ingredients.

EARTHWORKS

Using our products in earthworks

Products made with Relumat2000 can be used for a variety of applications in earthworks: such as for foundations, fundaments, walkways, stairs, railings, floors, slope stabilization & debris protection walls.

Foundations / substructures

Foundation elements

Pile substructure for viewing platform

Stairs

Staircase design

Staircase design and construction stages for beach access

Slope protection / path fixing

Foundation for protective wall

Fixed forest path with steps and banister

Bridges

Cycling and pedestrian bridge

Bridge theme park

Railings

Bridge with railings and decking

Railings for boat launch
